

## **BONE SCHOOL**

Dear Dr. Alexander Thomas

We would like to introduce an educational initiative titled “Bone School” which is aimed at providing a comprehensive learning experience for orthopaedic trainees and young orthopaedic surgeons. We propose to conduct “Bone School” on the second Sunday of every month and will invite Senior Orthopaedic Teachers to chair each session.

The objective of the programme is to:

1. To provide a comprehensive learning experience that includes lectures, case presentations and motor skills enhancement workshops – including Basic Surgical Skills Courses and Advanced Orthopaedic Skills Courses.
2. To enable orthopaedic post-graduate trainees to interact with and learn from Senior Teachers from various medical colleges and DNB institutions.
3. To provide a forum for orthopaedic trainees of various institutions to meet and learn from each other.

We would be grateful if you would consent to be a faculty at one of our sessions (please indicate your preferred month during the year). We also seek your support to ensure the success of the programme, by encouraging your post-graduate trainees to attend. There is no registration fee.

The first course will be held on January 8, 2012 and the focus is the Hip Joint. We would be grateful if you could display the attached programme details on your notice board for the information of your post-graduates.

Please could you post these details on the ANBAI website too.

Warm regards,

**Dr. Thomas Kishen**
