THE NU ADVANTAGE

Paediatric Urology

- Rare Skill set and Expertise available
- Competent Anaesthesia Team
- Paediatric Specific Imaging and Investigations
- Specific Cutting Edge Endo-Uro Instrumentation

Reconstructive Urology

- Complex Supra Major Surgeries
- Referral Centre
- Expertise in treating Urinary Incontinence

Neuro Urology & Uro Dynamics

- Paediatric Uro Dynamics Capability
- Specifically Trained and Experienced Consultant
- Special Unit – Nursing and Technician

Uro Oncology

- Tumor Board Governed
- Superior Outcomes/Results
- Comprehensive Treatment under one Roof

Pediatric Nephrology

- One of the very few Centers in India
- Committed Resources

Kidney Transplantation

- Active Cadaver Transplantation Program
- Living Donors-Laparoscopic Kidney Retrieval
- 400+ Kidney Transplants @ NU – Team

Andrology

- End to End Full Spectrum Service
- Leading to Integrated Assisted Reproductive Techniques
- Mens Sexual Health, Prosthetic Urology - Penile Implants

Infertility/ IVF

- Advanced technology for IVF treatment
- Specialized IVF Laboratory with state of the art equipments
- Experienced Specialists
- Systematic Treatment under One Roof
- Positive Results

Laparoscopic Urology

- Most Advanced Urological Surgeries
- Less In Hospital Stay, Quick Recovery, Accelerated Normalcy, Faster Back to Work
- Specialized State of Art Infrastructure
- Highly Trained Cohesive Team

Preventive Nephrology

- Lifestyle Management – Hypertensive-Diabetics
- Specialty Education Programs- Renal Disorders

MESSAGE

A good teacher is like a Candle – it consumes itself to light the way for other. –
Mustafa Kamal Atatürk

I am happy to note that the Association of National Board Accredited Institutions [ANBAI] Karnataka Chapter has decided to acknowledge and honour senior DNB teachers of Karnataka on the 20th of April 2019.

It is an acknowledged fact that the DNB stream of Post Graduate education, which is well structured, organized and efficiently managed, has indeed significantly and admirably contributed to the specialists arm of healthcare.

Acknowledging and honouring the services of such teachers is the bounder duty of every citizen, as their influence through the Specialists they have helped to create are offering their services across the Country.

While congratulating the teachers' fraternity, I wish the programme all success and hope that the DNB stream of Post graduate Education will also become the preferred stream by the aspiring Students.

MESSAGE

I am extremely pleased to know that the Association of National Board Accredited Institutions (ANBAI) Karnataka Chapter is organising Regional Teachers Day Awards in Bangalore on 20th April 2019 to felicitate some of the most illustrious members of medical faculty who have displayed outstanding commitment to the cause of postgraduate teaching and training programme in the Karnataka region.

"A good teacher is someone who is approachable, engaging and inspiring, and who has a sound knowledge of the underlying theory of what they are trying to teach. They also have the ability to communicate with confidence and clarity at all levels and can remember what it was like to be a DNB/PG residents and a junior doctor."

The role of the DNB teachers has always been vital in the all round personality development of the residents. In fact, a teacher is a role model influencing every facet of the student's growth and developing their innate potentials, in addition to being a motivator, guide and friend. Besides, the teacher of today is also responsible to enable and empower the learner to emerge as a competent youth, ready to take on the challenges of the rapidly changing medical field. Hence, it is imperative that the DNB teacher continuously upgrades his/her knowledge and methodology in order to enhance the quality of teaching. If the quality of teaching is good and the commitment of the teachers is high, the standard of the institution is bound to rise. NBE accredited institutions have played an important role in the creation of the much needed health human resources in the country. Each of the institutions whether owned by private enterprises or non-profit entities have contributed immensely by allowing access to other physical infrastructure and clinical material for teaching.

The collaborative approach between NBE and ANBAI has ensured quality, delivery of services as a component of training Post graduate doctors and specialists in their formative years. This shall go a long way in improving patient safety and creation of momentum of quality medical services as needed in the country.

I have great pleasure in wishing ANBAI Regional Teacher Award Ceremony a success. On this occasion, I congratulate awardees and wish them all success.

Warm Regards.

Abhijat Sheth

Message

"Teachers help you see the unseen and hear the unheard."

Medical Teachers dedicate their lives towards propagating expertise & knowledge and there by lay foundation towards newer scientific discoveries and inventions which have helped human address the problem of suffering in all its totality. Such noble souls need to be identified and honoured.

I am delighted to note that ANBAI Karnataka is organizing such a function on the 20th April 2019 at BMJH in Bangalore, to congratulate those who are being honoured.

I am happy to note that DNB specialists are immensely contributing towards the specialists care and urge aspiring Post Graduate Students to pursue DNB courses.

MESSAGE

I am happy to note that Association of National Board Accredited Institutions (ANBAI) Karnataka Chapter is honouring distinguished teachers for imparting their enriched medical knowledge to DNB/PG residents for furthering the cause of quality of medical education and excellence of health care in the country.

The trends of medical education in the "classroom" as well as "the bed side" are greatly changing with the incorporation of new learning technologies and advocacy of novel educational approaches. The teacher having a range of key roles to play in the education process extend far beyond the mere imparting of theoretical, stereotype concepts. Medical teacher's duties include the framing of personal and professional growth among medical students, a sense of responsibility for themselves and the requisite ethical standards for fulfilling the Hippocrates Oath of physicians. Effective teaching in medicine is essential to produce good quality doctors.

It is certain that DNB students and as well as DNB Faculty are playing significant role in contributing in enhancing various health profile status of India by meeting the demand supply gap of specialist doctors in the country and also addressing the issue of shortage of Post Graduate students in the country.

The quality of health care services available to the patients increases tremendously in the areas covered by hospitals that have teaching and research facilities. I am glad that the DNB programme through its innovative objective and strict recognition criteria introduced both these elements.

I extend my best wishes to office bearers of ANBAI Karnataka Chapter for great success of the award ceremony.

Best Regards,

(Dr. Rashmikanth Dave)

Message from

President, ANBAI Karnataka

Dr Venkatesh Krishnamoorthy

Greetings from ANBAI, Karnataka!

The National Board of Education is synonymous with postgraduate Medical Education in the country, for the past 37 years. The NBE has brought in a significant change in the pattern of educating as well as evaluating the postgraduate medical students, in all specialities.

ANBAI has been working closely with the NBE to bring about a cohesive working relationship with the NBE.

This year, on the 20th of April 2019, ANBAI in Karnataka is organizing the First ever Regional Teachers Day Awards, for senior NBE teachers of the State. This ceremony and function is significant, because we choose to honour the pioneers of teaching in the NBE stream.

The first DNB Accredited Institution in the Karnataka was started in 1984. These are the people who made path-breaking changes in the way PG Medical teaching happened, and brought recognition and equivalence to DNB teaching by way of involving the private hospitals in Karnataka.

ANBAI conveys its gratitude to all the teachers on this mementos occasion.

With regards,

A handwritten signature in black ink, appearing to read 'Venkatesh'.

Dr. Venkatesh Krishnamoorthy
President, ANBAI Karnataka

Message from

Patron, ANBAI

Dr. Devi Shetty

Dr. Devi Shetty MS, FRCS (England)
Chairman and Sr. Consultant Cardiac Surgeon

"I am delighted to note that ANBAI Karnataka Chapter is honouring the DNB teachers on April 20, 2019. The DNB programmes of National Board of Examinations has successfully churned out some of the best specialists. All credit must go to the excellent teachers in the ANBAI institutions, but for whom, we would have struggled to fulfill the bare need for specialists in the healthcare delivery.

Teaching is an art that works wonders when it effectively nourishes the student imbued with practical knowledge under watchful guidance. It is the teachers who have enabled the specialist programs with their knowledge, experience and the art of stoking passion among students in their chosen profession.

The best part is, that none of their precious contributions come to light beyond a limited clinical circles. It is a privilege to have such teachers among us and a rare opportunity to honour them. Our need for such teachers is higher than ever with the demand for more specialists in the country. I wish that breed of teachers to grow in the days to come."

With Warm Regards,

Dr. Devi Shetty

"Teachers, I believe, are the most responsible and important members of society because their professional efforts affect the fate of the earth".
Helen Caldicott

The Association of National Board Accredited Institutions [ANBAI] was formed with the objective of catalysing the energies of various National Board accredited institutions towards encouraging and evolving better teaching programmes and works closely with the National Board of Examinations in its journey towards Quality post graduate medical education in our country.

The ANBAI Karnataka Chapter under the able guidance and stewardship of Dr. Venkatesh Krishnamoorthy has done an excellent job in introducing innovative ideas and improving the quality of post graduate medical training in member Institutes.

We are happy to note that the ANBAI Karnataka chapter has chosen to identify and acknowledge the yeomen, dedicated, selfless services of DNB teachers who have put in more than 15 years of service. This meeting will also provide an opportunity for all stakeholders to interact and deliberate upon issues to improve and encourage institutions to take up DNB course.

We are also happy to note that Dr. Vinod Paul, Chairman Board of Governors, MCI along with Dr. Abhijat Sheth and Dr. Rashmi Kant Dave will be interacting with the delegates on 20th of April 2019. This would be a landmark event, forging a greater relationship between ANBAI and NBE for the betterment of postgraduate medical education in our country.

Dr. Alexander Thomas
National President

Dr. H S Chhabra
National Secretary

The Association of National Board Accredited Institutions (ANBAI)

This association was born with the aim to unite the National Board Accredited Institutions to catalyse their energies toward developing better teaching program and to present a credible and united front to solve problems together. The main focus of this association is to improve the camaraderie and the partnership between the National Board Accredited Institutions in working towards excellence. The association is also a forum to encourage innovative ideas in Post Graduate Medical teaching and hence enhance the standards of our students to International level.

The Primary Aims and Objectives of the association are

1. To associate and affiliate all the institutions that are currently conducting DNB courses in India into one credible and united organization.
2. To communicate grievances and problems in one voice to the NBE and to give positive feedback to the NBE. And to maintain / transmit all the rules and regulations of the NB to accredited institutions in an very transparent manner.
3. To safeguard the professional/ and academic interests of its member institutions and DNB students.
4. To hold regular meeting for teaching staff and students.

In the last six years, ANBAI has initiated and supported many initiatives to improve the landscape of the healthcare sector. Apart from several representations made to the government of India on the issue of the NBE governing council, ANBAI has also met with government officials and ministers about the Medical Council of India recommendations regarding teachers' eligibility qualification and the status of DNB qualifications. ANBAI supported the empowerment of nurses and clinical autonomy for nurse practioners in midwifery. ANBAI also submitted suggestions for the Allied and Healthcare Professional's Central Council Bill many of which have been accepted, including

representation of ANBAI in the Governing Body. ANBAI is also part of the consultation on private sector participation in expansion of Medical Education called by Ministry of Health & Family Welfare on the direction of the PMO.

ANBAI is a member of several alliances and represented on various boards that deal with issues affecting the health sector, and has participated in numerous national conclaves and consultations. ANBAI is a member of the National Steering Committee to review legal and ethical perspectives of healthcare in India. ANBAI is represented on the Task Force for Policy on Public Health, Govt. of Karnataka. After the introduction of entry-level standards by the National Accreditation Board for Hospitals and Healthcare Organisations (NABH), ANBAI has been promoting entry-level accreditation, especially among small healthcare Organisations, through the Consortium of Accredited Healthcare Organisations (CAHO). It works closely on various issues with the Association of Healthcare Providers, India (AHPI) including efforts to recover illegal deductions from UTI for their member hospitals, increasing procedure rates under CGHS for 20 procedures, campaigning for logical and transparent pricing, focusing on patient safety, participating in the "Save the Doctor" campaign to equalize the number of under-graduate and post-graduate seats, and negotiating with the government on bonuses and minimum wages in the healthcare sector. In Karnataka, AHPI and ANBAI were instrumental in reducing the electricity tariff for hospitals, removing the luxury tax on hospitals, recovering pending payments for member hospitals from ESIS, and protesting violence against hospital staff.

Today, ANBAI is a network connecting every NBE teaching hospital in India, with several State chapters across the country: in Delhi, Tamil Nadu, Andhra Pradesh & Telangana, Karnataka, Kerala, Maharashtra, and West Bengal including the North-Eastern states.

ANBAI Report 2017-2018

Dr. H.S. Chhabra
National Secretary, ANBAI

The Association for National Board-Accredited Institutions (ANBAI) is an apex organization of leading hospitals and medical institutions in India that are accredited by the National Board of Examinations (NBE), which administers the prestigious Diplomate National Board (DNB) and Fellow National Board (FNB) Programmes. Currently, the NBE conducts specialty and super specialty training programs in about 72 disciplines in approximately 524 accredited institutions spread across the country.

NBE and ANBAI have initiated many projects for the betterment of DNB faculty and students. In the last seven years, ANBAI has initiated and supported many initiatives to improve the landscape of the national health sector. It has also liaised with government officials and ministers about the Medical Council of India recommendations regarding teachers eligibility qualification and the status of DNB qualification.

ANBAI has worked very closely with NBE in various areas. We are thankful to NBE for increasing the accreditation cycle to 5 years, involving more NBE institute teachers as examiners and inspectors and for initiating the externship, awarding of adjunct professor titles and formation of specialty boards.

Criteria for hospital accreditation and other innovative ideas are being reviewed and discussed at NBE with inputs from ANBAI to ensure adequate number of quality professionals. ANBAI is also partnering with NBE through member hospitals to help in the online NEET process.

As an ongoing effort for seeking equivalence of DNB degrees with MD, after several meetings with PMO and Ministry of Health and Family Welfare ANBAI received a letter from the Under Secretary, Ministry of Health and Family Welfare dated 21st August 2017 that the PMO has instructed the Ministry to request MCI to provide the ministry with amendment proposal in TEQ regulations, deleting the 3 years junior residency requirement and to specifically mention DNB along with MD/MS in academic qualifications for various faculty posts. Further meetings with PMO and Ministry is being planned.

ANBAI governing council members had several meetings with Shri J P Nadda, Hon'ble Minister of Health and Family Welfare and with the Joint

Parliamentary committee to discuss the constitution and working of NMC. Shri J P Nadda has promised full support for equivalency of DNB with MD/MS degrees.

ANBAI has also been part of MOHFW & NITI Aayog committees to recommend ways and means to improve PG training in the country and is also exploring the possibility of starting a course in professional ethics along with AHPI & NLSIU.

The NBE faculty have been trained in healthcare communication and quality in health, the two crucial areas which do not have a place in the present medical curriculum. ANBAI is on the NBE-UNESCO Steering Committee on Teaching of Bioethics in PG Medical Education and on the Uniform Learning Resources Committee of the NBE.

Realizing the importance of quality scientific resources (journals/ books etc.) in higher education in healthcare, ANBAI is trying to explore and facilitate a system, which will enable the end users and their institutions access to quality and standard content at a substantially economic price. ANBAI is collaborating with over 103 DNB Institutions and negotiating with 8 leading publishers for E-Journals to try to get significant discounts.

ANBAI had organised Teachers day celebration on 5th September 2017 at NBE Auditorium, New Delhi. On this occasion, awards were given to several eminent teachers and Institutions and 22nd September 2018 in Bangalore. During the Teachers Day 2018, held at Indian Institute of Science, Bangalore, a White Paper was prepared incorporating best practices of non-health institutes of excellence in the country. This has been presented to NITI Aayog and the Health Minister.

Another initiative under the leadership of the President was the consolidation of the State Chapter Governing Councils of ANBAI. Several state chapters of the Association held academic activities so that ANBAI could continue to work further to realise the objective of serving the society. ANBAI has started publishing its Newsletter.

The partnership between NBE and ANBAI today is exemplary and characterized by collaboration and strength in teamwork for the benefit of the health sector in our

Smoking ban gets stricter in bars, restaurants in state

'Smoking area must, habit should be discouraged there too'

BENGALURU: The government has imposed a complete ban on smoking in bars and restaurants across the state.

To discourage smoking in smoking areas in these places, there is a prohibition on serving not just food and beverages, but also keeping chairs, tables, ashtrays and matchboxes there.

Acting on the findings by Global Adult Tobacco Survey (GATS), which says that the health of the general public is affected by passive smoking, the government issued a circular on November 17, enforcing a strict ban on smoking in public places.

For implementing the provisions of the Karnataka Prohibition of Smoking and Protection of Health of Non-Smokers Act, 2001, the circular says smoking is banned in places where there is density of

population, like hotels, bars, restaurants, pubs and clubs.

As per the Cigarettes and Other Tobacco Products Act (COTPA), 2003, there is a rule that in any hotel, restaurant,

pub, club having more than 30 seats, a smoking area has to be created.

The smoking areas will have to follow certain conditions like not allowing minors in the areas, no serving food or bev-

Acting on the findings by Global Adult Tobacco Survey (GATS), which says that the health of the general public is affected by passive smoking, the government issued a circular on November 17, enforcing a strict ban on smoking in public places.

verages, to discourage smoking in the smoking area.

The rule also prevents the owners from having chairs or tables and even keeping ashtrays and matchboxes. The hotel owners will have to get necessary permits from the local bodies for creating a designated smoking area.

The circular says hotel owners will have to strictly follow the provisions of COTPA and if there is any violation, there are chances that the licence of the owner may be cancelled.

The new circular was part of the joint consultation meet-

ing 'Advancing Urban Health Policies, Key Policies for Non-communicable Diseases Prevention,' organised by the government, in association with the National Centre for Disease Informatics and Research (NCDIR), Association of Healthcare Providers (India) and Association of National Board Accredited Institutions.

The move will help in protecting thousands of staff and non-smoking customers, especially women and children, from the harmful effects of second-hand smoking.

THE 1 STOP CONTROL SUITE

TO SUSTAIN QUALITY AND IMPROVE OUTCOMES

While all Hospitals have their own unique challenges and issues, they all struggle with the same challenge of getting employees to adhere to laid out practices and building a culture where Quality practices are sustained.

IBHAR empowers management and employees of a healthcare provider to quickly implement and sustain practices that deliver safe and quality care to its patients.

This is achieved by getting organizations

- "put in place" all that is required based on a standard/guideline (NABH, WHO, CDC, AHRQ)
- ensure employees have the right knowledge by providing study material and assessing them thereafter
- continually audit and monitor practices for compliance
- record data that can help understand outcome
- monitor, control and manage infections
- monitor equipment and ensure uptime
- review adherence, outcome and improvements through structured dashboards.

**IBHAR PUTS YOU IN
CONTROL WITHIN WEEKS,
REDUCES UNCERTAINTY,
LOWERS COST AND
IMPROVES OUTCOME**

**YOU ACHIEVE ALL THIS AT
A COST OF LESS THAN ONE
HUMAN RESOURCE**
